Packaging Matters

C.L. Smith Achieves EcoVadis Certification

C.L. Smith's mission is to "Provide exceptional packaging solutions through our passion for service, extensive technical expertise and unrelenting problem solving, to continuously earn the long term trust and loyalty of our customers." We support our mission by pledging to provide packaging solutions in the most sustainable nature possible.

Our commitment to sustainability was validated by EcoVadis. We are thrilled to announce that on our very first attempt at certification, C.L. Smith received a Silver Recognition Level as a corporate social responsible company. We are proud to be in the top 30% of over 50,000 companies rated across 150 countries worldwide by the EcoVadis sustainability methodology.

C.L. SMITH SUSTAINABILITY INITIATIVES

- EcoVadis is a platform that aims to improve environmental and social practices of companies by leveraging the influence of global supply chains.
- It's the 1st collaborative platform enabling companies to monitor the sustainability performance of their suppliers.
- Companies are analyzed and graded against industry best practice in the areas of Environment, Labor Practices, Fair Business Practices, and Sustainable Procurement Practices.

To find out how you can incorporate sustainability initiatives into your packaging program, contact your C.L. Smith representative at 800-264-1202 to learn more!

As a bottle manufacturer, UN certifier and container distributor, we are uniquely positioned to provide sustainable packaging solutions throughout the entire packaging lifecycle.

For C.L. Smith, this means:

- Reducing gram weight
- Providing returnable bulk packaging options
- Reconfiguring cartons to lighter board grade
- Re-shipper packaging available
- Utilizing recycled materials
- Alternative options to PVC available
- SKU Reductions
- Offering re-fillable/reusable containers
- Integrated partitions

New Sustainable Product Features

At C.L. Smith we aim to do *More With Less*. We partner with companies across many industries to design customer-specific sustainable packaging systems that can be integrated into your products and satisfy a variety of environmental objectives.
